Games, Parents, Teachers: a resource

www.gamesparentsteachers.com

By Marc Prensky

Are you a parent concerned about the computer and video games your kids incessantly play? Do you wish you could discuss the games more with your children, but don’t know where to begin?

Are you a teacher who would like to use computer and video games in class in some way, but don’t know which games or how to integrate them? Would you like suggestions, and to hear what others have done successfully?

Are you (or do you know) a kid who plays games for a good part of life? Would you like non game playing adults, such as your parents and teachers, to understand and value what you are learning and getting from your games and game time?

If you are any of the above, the site www.gamesparentsteachers.com is a resource for you. You can look up games by name, and look up subjects where games can help. There are comments from gamers, questions for adult-gamer discussion, and suggestions and models for using games in conjunction with teaching, including things that have worked successfully for other teachers.

www.gamesparentsteachers.com is also a place for you and your game playing kids to contribute. Game players can contribute to either the GAMER or the PARENT sections. Teachers who have used a game successfully, or who know of a game lesson plan or teachers guide online, can contribute to the TEACHER section.

“Contributing” means only filling out and faxing the attached forms, or writing an email and sending it to marc@games2train.com. The fax number is (+1) 212-472-4732.

I welcome all contributions, and will post all that are appropriate. Thanks for helping, and please spread the word to kids, parents and teachers!
